Speakers

Sarah N. Taylor, MD
Dr. Taylor is an Associate Professor and attending neonatologist at MUSC. She speaks internationally on topics of preterm infant nutrition and breast milk. Her research interests are in preterm infant nutrition and growth and she is currently funded by the National Institute of Health to study the vitamin D needs of preterm infants.

Pamela K. Murphy, PhD, CNM, IBCLC
Dr. Murphy is a certified nurse midwife and lactation consultant who is employed by Ameda Breastfeeding Products as their Clinical Development Manager. Over the past 14 years she has provided care to women and their healthy full term or high-risk/preterm infants working in hospital and private practice settings. Her research interests focus on maternal nutrition & its effects on the maternal/child dyad and transitioning preterm infants to breastfeeding.

Katlyn McGrattan, PhD(c), MS, CF-SLP
Katlyn McGrattan is a speech language pathologist and clinical researcher at the Medical University of South Carolina Children’s Hospital. Katlyn’s primary research focus is aimed at improving the standardization of pediatric dysphagia diagnosis and treatment. Current investigations include the identification of optimal physiologic maturation of the swallowing mechanism, standardization of the modified barium swallow study, and identification of cross-system correlations between sucking physiology and swallowing physiology both in bottle and breastfeeding infants.
